OUR VISION

Investing *always* comes with risk. How much one is willing to risk is where the difference lies. With network marketing, the risk can be very minimal.

LOOK
BOOK

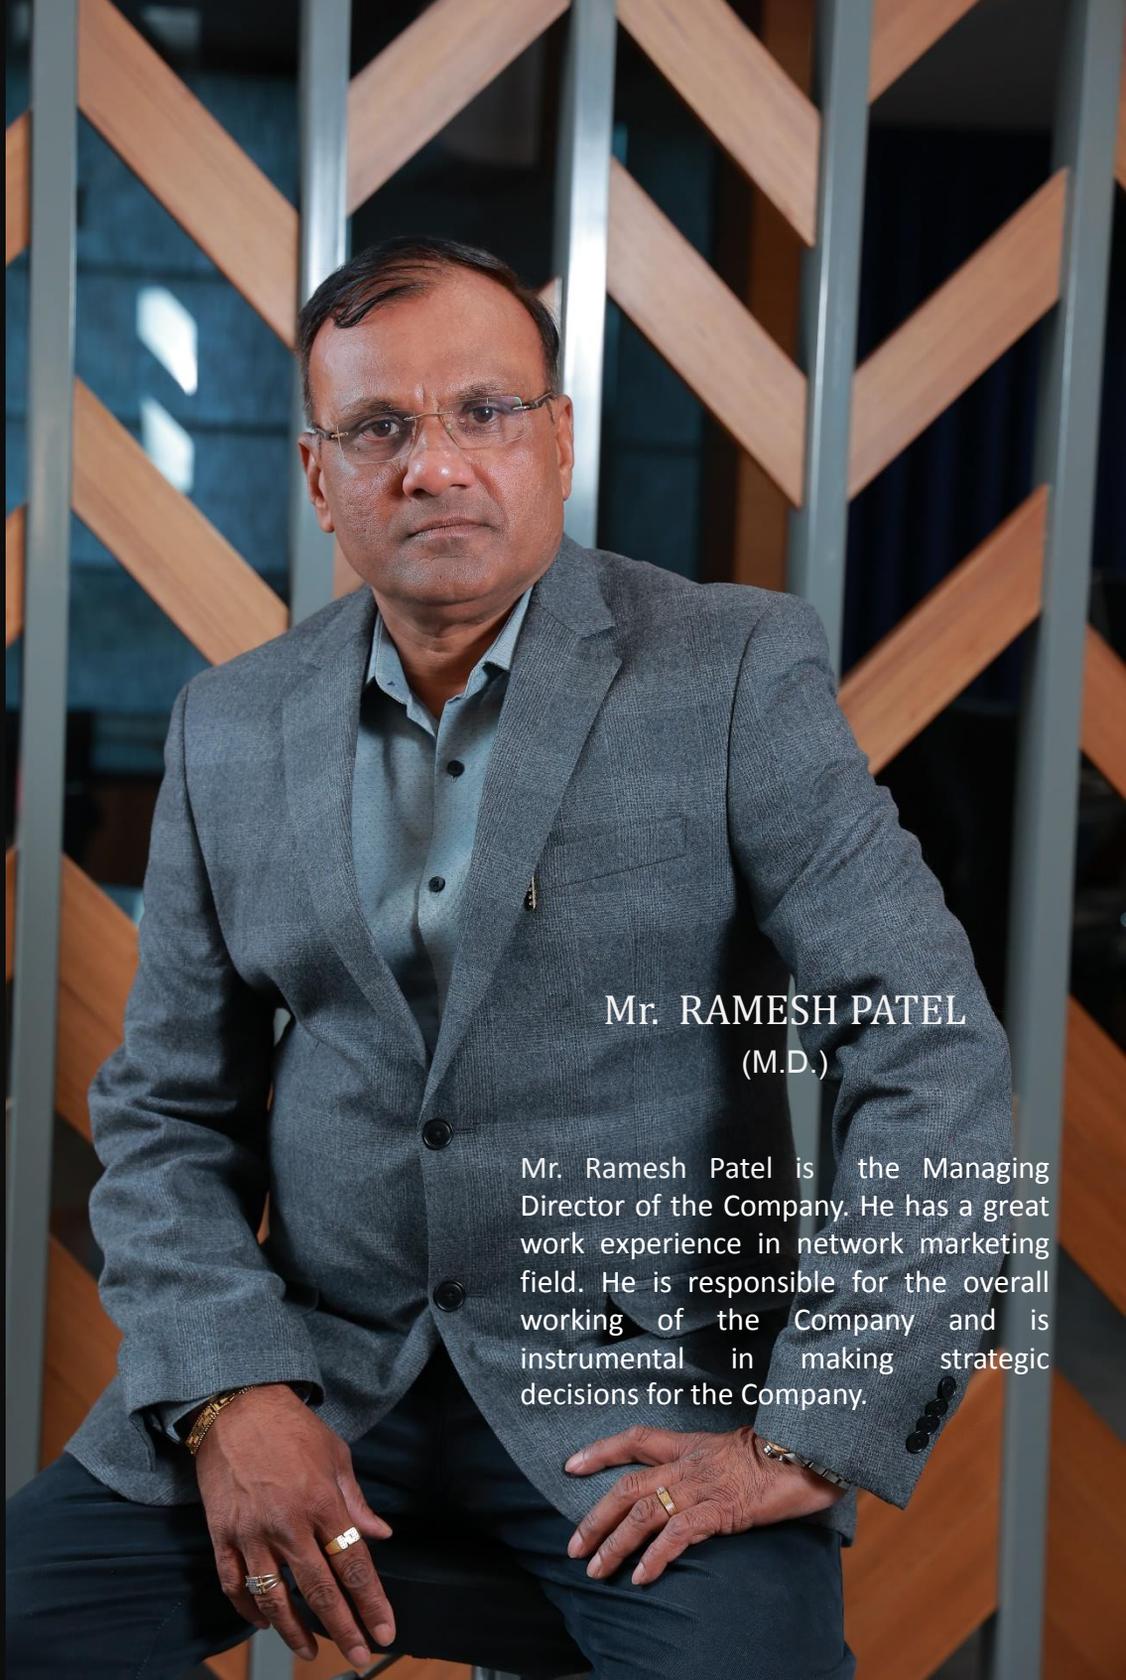

There is no doubt that one of the greatest advantages of Networking Marketing is Income.

The sky is the limit in network marketing. How much money you earn is directly related to how much effort you're willing to put in. Once you've set those gears in motion, your business "machine" will run quietly, smoothly, and efficiently so long as you see fit. In a traditional business model, there are limits as to how much one can earn within their field given their skill set, performance, and a few other factors. This is called the "market standard," and most working people are confined to this standard – the old industrial aged system.

With network marketing, there is no such standard because the standard is now defined by you. It is an open playing field where everyone starts at the same level. Create your own hours – Part-time? Full-time? Weekends? Holidays? It's all up to you. Your success is now directly tied to your ambitions and goals. Once you decide to become a network marketer, you will be able to market *anything* and generate the income you desire.

SHINER

Raw wood accents look great, but by using a YASHBIZ WOODEN SHINER your wood will enhance the natural colors and leave a beautiful finish.

Whether you're looking to spruce up a piece of solid wood furniture, shine some hardwood floors, or finish some raw wood, YASHBIZ WOOD SHINER is a great option to add shine and longevity to any wood you have.

No matter the size of your project, polishing wood is a fairly straightforward process that you can do by yourself!

Polish

Coat the surface of the wood sparingly with YASHBIZ WOOD SHINER. It may be tempting to over polish, but remember: any excess wax will need to be wiped off after it has dried, and the less you have to do this, the easier the process.

Buff

After giving the SHINER some time to absorb (usually about 15-20 minutes), wipe off excess wax with a clean, dry cloth.

HOW TO USE:

Spray or pour the solution on a soft cloth and work it into the wood, wiping in the same direction as the wood grain. If the wood seems dry, let the solution sit and then go over it again.

BENEFITS

- The furniture item has become more radiant.
- The surface is protected from scratching and external damage.
- The wood has become moisture resistant.
- The finished piece is softer and protected from hairline cracks.
